Sherwin-Williams® Paint Match for KCD Cabinets

Kitchen Cabinet Distributors™ uses Sherwin-Williams® premium paint and stains for finishing our cabinets. The paint coatings used in the manufacturing of our cabinets are formulated specifically for production on an inline finishing equipment at the time of production. This process is important in manufacturing to provide exceptional coverage and durability but is not a process that is easily replicated outside of large-scale manufacturing.

The experts at Sherwin-Williams have worked to match their paints to KCDs cabinet colors and have made them available at any retail or commercial Sherwin-Williams store. By taking the formulations below to any Sherwin-Williams retail or commercial store, experts will be able to assist in creating the paint or stain that is the closest match to the KCD cabinet color.

Because the finishing process used in manufacturing is different than the finishing that may occur after the sale for trim, molding, or cabinet painting, it is important to note that the formulations provided below are intended to be the most accurate match as recommended by color experts at Sherwin-Williams. We recommend testing the color prior to painting by applying and drying a small amount to a sample chip prior to painting.

If you have any questions on paint matching, please contact your local Sherwin-Williams retail location.

Y3-Deep Gold	-	35	-	1																	

Note: the mixture for Brooklyn White, Oslo White, and Essential White do not need any tint added. They are the correct color without anything added.

Stained Finishes: At KCD we understand the importance of achieving the perfect color match for your cabinets. However, we do not provide specific stain codes for our stained finishes, as these can be challenging to replicate accurately. The final appearance of the stain can vary based on the wood species, grain, and environmental factors such as lighting.

To achieve the closest possible match:

- We recommend ordering a sample of your desired cabinet finish from KCD.
- Take the sample to your local Sherwin-Williams store, where their experts can create a custom stain mix tailored to your specific wood surface. This custom mix ensures the best match for your needs.

Sherwin-Williams also advises bringing the actual wood you intend to stain along with the sample to their store. Their team will help achieve the most accurate color match based on the unique characteristics of your project.
